

library preparation methods for next generation sequencing - *next generation sequencing ngs has caused a revolution in biology ngs requires the preparation of libraries in which fragments of dna or rna molecules are fused, **optimised cdna size selection and cloning procedure for** - optimised cdna size selection and cloning procedure for the construction of representative plasmid cdna libraries, **microrna assay methods a review of current technologies** - micrnas mirnas are a comparatively small target to experimentally verify and quantify in the lab we review the most popular methods currently in use, **universal sybr green quantitative pcr protocol sigma aldrich** - methods of quantification standard curves standard curves are necessary for both absolute and relative quantification when generating standard curves different, **pcr amplification promega com** - this chapter of the protocols and applications guide provides protocols and background information about pcr and rt pcr*
